Reasons for Allowance

1. Claims 1-11, 13-27, 29,47, and 49-53 are allowed over the prior art of record.
2. The following is a statement of reasons for the indication of allowable subject matter: The prior art of record fails to disclose either singularly or in combination a system for electromagnetic compatibility-driven design wherein each among said at least one emissions profile includes results of a plurality of electromagnetic near-field measurements, and wherein for at least one emissions profile, each among said plurality of electromagnetic near-field measurements is associated with a location in a grid, said grid having boundaries and at least two spatial dimensions, and wherein the information regarding an induced electromagnetic field includes a plurality of amplitudes of the induced electromagnetic field, and wherein each among the plurality of amplitudes corresponds to one among a plurality of spatial locations, and wherein at least one among the plurality of spatial locations lies outside the boundaries of said grid.
3. Applicants traverse of examiner's objection to the drawings is acknowledged and withdrawn because the susceptibility profiles would be implicitly comprehended by one of ordinary skill in the art as noted in the remarks on page 13 of the amendment filed 9/26/03.
